Research Equipment

Equipment System for the realization of new temperature scale

Contact or responsible person

Name and Surname: Janko Drnovšek

Department: LMK

Tel: +38614768223

e-mail: janko.drnovsek@fe.uni-lj.si

Purpose of equipment and additional information

The system is used for realization and monitoring of the realization of different fixed points. It is used to disseminate the value of the primary temperature standard to the working standards within research institutions and industry.

Access to equipment

Equipment is available at LMK, Fakulteta za elektrotehniko, Tržaška 25, Ljubljana.

The instrument can be shared in a scope of transfer of primary standard value at the highest metrological level (interlaboratory comparison). Due to frequent use, the external use of the instrument shall be agreed upon long time in advance. The cost of the external use is based on the working time of the instrument and expert hours of the operator.

Price of equipment use
